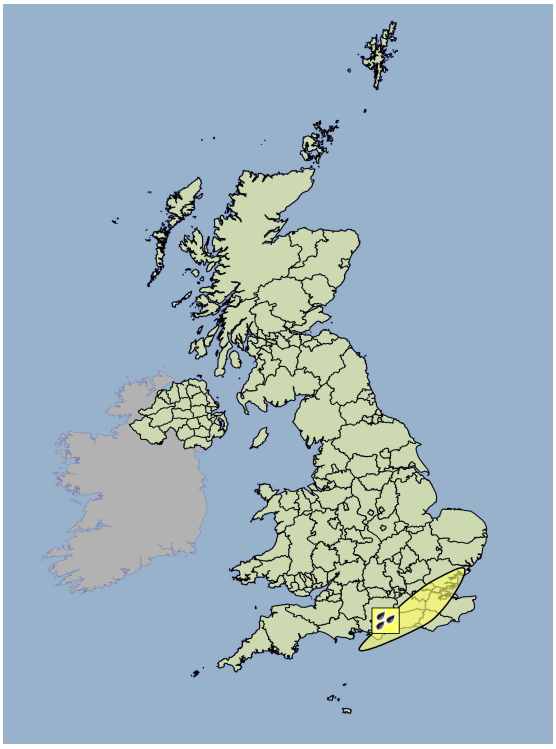
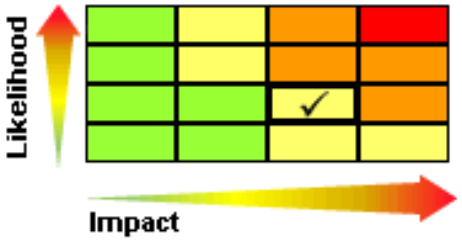
National Severe Weather Warning Service





Chief Forecasters Assessment
Bands of showers last night brought some heavy rainfall to parts of the southeast of England resulting in some surface water flooding. Although showers will tend to ease later this morning and early this afternoon, (with mostly less than 10 mm additional rainfall), residual impacts, especially in terms of surface water flooding, will last into the afternoon.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **07:50 on Fri, 17th Jan 2014** until **16:00 on Fri, 17th Jan 2014**

Further showers, some heavy, will affect parts of the southeast of England this morning, dying away by early afternoon.

The warning has been updated in light of the latest ideas on the duration of impacts.

The public should be aware that, given the saturated ground, some disruption from localised flooding is likely.
